WHAT CHANGED / WHERE TO FIND IT / HOW TO USE IT

Discover the new feature, find it in the app and follow the associated workflow.

Supplier Stock and availability

Find the required product and understand what is available to order.

What is new

The **Supplier Stock** directory combines product and supplier-code search, availability filters, classification filters and a stock balance that reflects existing allocations.

Where you will encounter it

Application navigation → **Supplier Stock**. Search and filters sit above the results; stock balances appear in Baseline, Holds, On Order, **Net Orderable** and Health.

How it fits your workflow

Find the item → narrow the catalogue → confirm specification and pack → read **Net Orderable** → choose a suitable supplier offer before raising the request.

Section	Page
Search the Supplier Stock directory	3
Use availability and classification filters	4
Interpret dynamic stock balances	5
Daily checks	6

Key action

Use **Net Orderable** for the quantity decision. Supplier reports provide the starting point; confirm fresh supply when availability or timing is uncertain.

Supplier Stock directory

The new directory brings product search, supplier offers and available quantities into one place before you raise a request.

Where in the app

Application navigation → **Supplier Stock**. Search and ordering actions appear within the directory.

The screenshot shows the 'Supplier Stock' directory interface. At the top, there is a search bar with 'HSPG02' entered. Below the search bar, there are filters for 'HIERARCHY' (All Pools, All Catalogues, All Item Types, All Categories, All Sub-categories, All Stock Levels) and a 'Clear Filters' button. A 'SUPPLIER' filter shows 'All (248)' and a list of suppliers including 'Bundle Australia Pty Ltd', 'Canasin International Textile', 'Crystal Healthcare Products Pty Ltd', 'Cy Linen Supply', 'Frenkel Textiles', 'FREUDENBERG HOME AND CLEANING SOLUTIONS PTY. LTD', and 'Globo'. The main table is titled 'Available Supplier Stock Catalog' and shows 2 items. The table has columns: PRODUCT & INTERNAL SKU, SUPPLIER & CODE, UNIT PRICE, BASELINE, HOLDS, ON ORDER, NET ORDERABLE, HEALTH, and ACTION. The first row shows 'THT SCRUB PANT - M GREEN' from 'NCC Apparel Pty Ltd' with a unit price of \$5.56, a baseline of 2,640, and 1,860 net orderable units. The second row shows 'THT SCRUB PANT - M GREEN' from 'Simba Global - Healt...' with a unit price of \$8.99, a baseline of 2,070, and 2,070 net orderable units. Both rows have an 'In Stock' status and an 'Order' button.

PRODUCT & INTERNAL SKU	SUPPLIER & CODE	UNIT PRICE	BASLINE	HOLDS	ON ORDER	NET ORDERABLE	HEALTH	ACTION
THT SCRUB PANT - M GREEN SKU: HSPG02 Theatre Scrubs-Bottom Pants	NCC Apparel Pty Ltd Code: HSPG02	\$5.56	2,640	-510	270	1,860 Pack: 1	In Stock	Order
THT SCRUB PANT - M GREEN SKU: HSPG02 Theatre Scrubs-Bottom Pants	Simba Global - Healt... Code: 336AS887D	\$8.99	2,070	0	0	2,070 Pack: 1	In Stock	Order

HSPG02 results show the supplier-wide orderable balance from the imported baseline and current allocations.

- 1 Open Supplier Stock**
Use **Supplier Stock** in the application navigation.
- 2 Search for HSPG02**
Enter HSPG02 in Search product, SKU, supplier. The directory searches internal and supplier codes as well as descriptions.
- 3 Read the supplier rows**
Locate THT SCRUB PANT - M GREEN. Check the supplier name and its own supplier code.
- 4 Confirm the product**
Check size, specification and pack details before proceeding. A similar name alone is not enough to establish suitability.

Expected result

NCC shows 1,860 orderable units and Simba Healthcare shows 2,070. Available stock only hides offers with a zero balance.

Availability and classification filters

The directory can now focus results by orderable stock, stock health, supplier and product classification. **Available stock only** is on by default.

Where in the app

Supplier Stock → search and filter bar above the results table.

The screenshot shows the 'Supplier Stock' interface. At the top, there is a search bar with 'HSPG02' entered. Below the search bar, there are several filter tabs: 'Available stock only' (selected), 'Compare Prices', 'Table', and 'Grid'. A 'Clear Filters' button is also present. Below these, there are dropdown menus for 'HIERARCHY' (All Pools), 'All Catalogues', 'All Item Types' (Scrub-Bottom), 'All Sub-categories', and 'All Stock Levels'. A 'SUPPLIER' section shows a list of suppliers with counts in parentheses: 'All (248)', 'Bundle Australia Pty Ltd (0)', 'Canasin International Textile (0)', 'Crystal Healthcare Products Pty Ltd (0)', 'Cy Linen Supply (10)', 'Frenkel Textiles (13)', 'FREUDENBERG HOME AND CLEANING SOLUTIONS PTY. LTD (0)', and 'Globo'. Below this is a section titled 'Available Supplier Stock Catalog' with a '2 Items' badge. The table below shows two items, both 'THT SCRUB PANT - M GREEN'. The first item is from 'NCC Apparel Pty Ltd' with a unit price of \$5.56 and a baseline of 2,640. The second item is from 'Simba Global - Healt...' with a unit price of \$8.99 and a baseline of 2,070. Both items are marked as 'In Stock' and have an 'Order' button. The table also shows columns for 'UNIT PRICE', 'BASELINE', 'HOLDS', 'ON ORDER', 'NET ORDERABLE', and 'HEALTH'. The bottom of the table shows 'Showing 1-2 of 2 items' and 'Page 1 of 1'.

PRODUCT & INTERNAL SKU	SUPPLIER & CODE	UNIT PRICE	BASELINE	HOLDS	ON ORDER	NET ORDERABLE	HEALTH	ACTION
THT SCRUB PANT - M GREEN SKU: HSPG02 Theatre Scrub-Bottom Pants	NCC Apparel Pty Ltd Code: HSPG02	\$5.56	2,640	-510	270	1,860 Pack: 1	In Stock	Order
THT SCRUB PANT - M GREEN SKU: HSPG02 Theatre Scrub-Bottom Pants	Simba Global - Healt... Code: 336AS887D	\$8.99	2,070	0	0	2,070 Pack: 1	In Stock	Order

The Scrubs-Bottom classification narrows matching results to the required product family.

- 1 Choose a classification**
Select Pool, Catalogue, Item Type, Category and Sub-category as needed. These reflect the classifications maintained in Admin.
- 2 Filter the product family**
Select Category Scrubs-Bottom and search HSPG02. Check that the remaining offers match the required product.
- 3 Inspect stock status**
Use All Stock Levels to select In Stock, Low Stock, Reservation Pressure or Out of Stock. Low Stock marks positive balances below 50, unless reservation pressure takes precedence.
- 4 Reveal unavailable offers**
Turn **Available stock only** off before investigating zero-stock items. Choosing Out of Stock also switches off the availability filter.
- 5 Start again cleanly**
Select **Clear Filters**. It clears search and hierarchy selections and restores **Available stock only**.

Expected result

Matching HSPG02 offers remain visible after classification filtering. Clearing filters restores the general available catalogue.

Dynamic stock balances

The displayed orderable quantity now reflects stock already allocated to approved requests and applicable issued POs, with pack requirements applied.

Where in the app

Supplier Stock → Baseline, Holds, On Order, **Net Orderable** and Health columns.

PRODUCT & INTERNAL SKU	SUPPLIER & CODE	UNIT PRICE	BASELINE	HOLDS	ON ORDER	NET ORDERABLE	HEALTH	ACTION
THT SCRUB PANT - M GREEN SKU: HSPG02 • Theatre • Scrubs-Bottom • Pants	NCC Apparel Pty Ltd DEFAULT Code: HSPG02	\$5.56	2,640	-510	270	1,860 Pack: 1	In Stock	
THT SCRUB PANT - M GREEN SKU: HSPG02 • Theatre • Scrubs-Bottom • Pants	Simba Global - Health... ALT Code: 31665AR710	\$8.99	2,070	0	0	2,070 Pack: 1	In Stock	

The HSPG02 row separates Baseline, Holds, On Order and Net Orderable.

Column	Meaning	HSPG02 balance
Baseline	Latest matched supplier snapshot converted into product units.	2,640
Holds	Active approved reservations awaiting Concur PO issuance.	510
On Order	All issued PO units not yet received. Only commitments after the supplier baseline also reduce Net Orderable.	270
Net Orderable	Remaining stock, rounded down to the ordering multiple.	1,860
Health	A quick signal for low stock, high holds or no orderable stock.	In Stock

Read the balance

2,640 baseline units – 510 reserved units – 270 commitments after the baseline = 1,860 orderable units for NCC HSPG02.

When packs matter

Remaining units are rounded down to the ordering multiple. HSPG02 uses a multiple of 1; products sold in packs must follow their own multiple.

Snapshot freshness

Balances use dated supplier reports and supplier-wide allocations across all sites. The calculation time does not change the supplier baseline date. Confirm current supply when timing is uncertain.

A zero net balance can mean stock has already been allocated. It does not necessarily mean the supplier's original report showed zero physical stock.

Daily checks

Use the balance to decide whether the proposed quantity is orderable.

Before raising a request

Use the matching supplier offer and Net Orderable to assess your requirement. Check the physical specification, ordering multiple and supplier baseline date before proceeding.

Before progressing

1

Confirm the product

Check the internal code, supplier code, size and specification.

3

Investigate a missing item

Clear Filters or turn **Available stock only** off. Out-of-stock offers may be hidden by the default availability filter.

2

Confirm units and packs

Check the ordering multiple and use **Net Orderable**, rather than Baseline alone.

4

Confirm freshness

Check the supplier baseline date and confirm current supply if necessary. Site selection filters request views; it does not exclude other sites from shared stock balances.

Quick check

Why can Baseline be positive while **Net Orderable** is zero? Existing holds, applicable quantities on order or pack rounding may consume the orderable balance. Check the breakdown before purchasing.
