

ProcureFlow Operating Platform

Master Executive Showcase Brief & Operational Transformation Blueprint

ProcureFlow

THE THREE-HORIZON STRATEGIC TRANSFORMATION

From disparate manual ordering and 2–3 days of month-end spreadsheet crunching to an automated, closed-loop spend governance backbone connecting **all 11 operating facilities**, managing Specialised Linen Services’ **\$14.521M FY27 linen budget**, and bridging directly to **SAP Business One (SAP B1)**.

TARGET AUDIENCE

Ebrahim Mokhtari (Chief Operating Officer)

OPERATIONAL NETWORK SCOPE

11 Active Facilities (100% Live in Production)

KEY CONTRIBUTORS

Kiran (Analytics) & David (Regional Operations)

PRIMARY AUTHORS

Aaron Bell (Tech Lead) & Ashish Chhabra (Procurement Lead)

APPROVED OPERATING BASELINE

\$14.521M FY27 Operating Linen Budget

PUBLICATION DATE & VERSION

September 2026 | Version 5.2 Enterprise Edition

1. Executive Context & Operating Mandate

Linen procurement directly underpins daily continuous operations across Specialised Linen Services. Unlike static corporate purchasing, commercial laundry wash tunnels cannot halt without catastrophic hospital network and hotel service failures.

TOTAL FY27 LINEN BUDGET

\$14.521M

Baseline Operating Spend

DEPLETION RUN-RATE

\$9.921M

\$826.8k / Month Target

NEW BUSINESS GROWTH

\$2.300M

\$191.7k / Month Pool

LINEN HUB ALLOCATION

\$2.300M

Dedicated Decrement Pool

2. National Operating Footprint: 11 Active Facilities

ProcureFlow is actively operational across every processing plant, dedicated hospitality facility, and administrative holding entity in the national network:

CODE	FACILITY NAME	PHYSICAL LOCATION	PRIMARY OPERATIONAL FOCUS	PLANT LEADERSHIP
MEL	SPL Melbourne	Broadmeadows, VIC (1100 Pascoe Vale Rd)	Major Victorian healthcare & commercial laundry plant	David / Matt
SYD	SPL Sydney (Bankstown)	Bankstown, NSW (350 Hume Hwy)	Primary NSW acute healthcare processing hub	Site Manager NSW
SYD	SPL Sydney (Classic Linen)	Bankstown, NSW (350 Hume Hwy)	Dedicated high-volume accommodation & hospitality lines	Linen Manager Classic
BNE	SPL Brisbane	Meadowbrook, QLD (50 University Drive)	Queensland metropolitan & regional healthcare routes	Site Manager QLD
ADL	SPL Adelaide	Torrensville, SA (123 Ashwin Parade)	South Australian commercial & health processing hub	Site Manager SA
PER	SPL Perth (Belmont)	Belmont, WA (200 Great Eastern Hwy)	Primary Western Australia processing facility	Site Manager WA1
PER	SPL Perth (Maddington)	Maddington, WA (55 Kelvin Rd)	Secondary Western Australia regional/mining routes	Site Manager WA2
MKY	SPL Mackay	Paget, QLD (15 Gateway Drive)	Regional North Queensland healthcare & industrial processing	Site Manager Mackay
CNS	SPL Cairns	Cairns, QLD	Far North Queensland hospitality & acute health routes	Site Manager Cairns
ALB	SPL Albury	Albury, NSW (1 Olive Street)	Regional NSW/VIC cross-border healthcare operations	David / Manager Albury
HOL	Holdings / Linen Hub	National Holdings ('HOL')	\$2.30M Linen Hub managed injection, bulk orders & Airlie Beach	Ashish / Eb Mokhtari

3. The Detailed Previous State: 9 Structural Friction Points

In our deep-dive review sessions with Ashish Chhabra, three master workbooks (*Aaron File Concur Data 28.08.2026.xls* with 919 historical records, *Purchase Request EOM SEP-26.xls*, and *GRAPH EOM TRACKING.xlsx*) were analyzed. Nine root operational bottlenecks were identified:

Case 1: Face Washer Carton Modulo Breakdown

REJECTION LOOP

The Incident: A laundry plant submitted a PO for 5,000 units. The contracted supplier carton size was 240 units (5,000 / 240 = 20.83 cartons). Simba rejected the order. Ashish spent hours manually triaging and re-ordering for 21 full cartons (5,040 units).

Case 2: 10¢ Price Drift Freezing Concur

INVOICE HOLD

The Incident: A face washer contracted at 51¢ from Simba was keyed by a site user as 61¢ (a 10¢ keystroke error). When the 51¢ invoice arrived, Concur's 3-way match failed, freezing payments and threatening vendor credit holds.

Case 3: Melbourne \$1.6M National Attribution

SITE DISPUTE

The Incident: A national distribution order was raised under Melbourne for administrative simplicity but delivered across Perth, Sydney, and Adelaide. Melbourne Site Manager Matt disputed being charged \$1.6M for linen Melbourne never received.

Case 4: Order MAY-490 Ghost Commitment

OPEN LIABILITY

The Incident: Goods were 100% physically delivered to the plant weeks earlier. The order remained open because the site user closed their browser without clicking "Complete", distorting company commitment reporting.

Summary of the 9 Historical Bottlenecks

Friction Point	Historical Operating Reality	Business Impact to Specialised Linen Services
1. Manual EOM Crunch	Ashish manually stripped GST (=G2/1.1'), matched branches, and deciphered '-A-' vs '-H-'.	Consumed 2–3 days each month; prone to formula errors; delayed executive oversight.
2. Broken Carton Packs	Plant supervisors entered arbitrary numbers outside supplier carton multiples.	Frequent vendor delivery rejections; Ashish spent 15–20 hrs/week recalculating packs.
3. Free-Text Pricing	Unlocked price fields allowed keystroke typos to enter SAP Concur.	3-way matching freezes in AP; delayed supplier payments; vendor credit holds.
4. Missing Concur PRs	Goods receipted on site without recording the Concur PR or PO number.	Zero cross-system auditability; unlinked purchase orders on company books.
5. Ghost Open POs	100% physically delivered orders left open in the system indefinitely.	Artificially inflated open commitments; distorted financial liability reporting.
6. Invisible Late Deliveries	Orders delayed > 14 days were silent until laundry wash floors ran out of linen.	Emergency reorders, customer hospital service interruptions, premium freight charges.
7. Multi-Facility Disputes	Central bulk orders charged entirely to originating site without attribution.	Friction between plant managers and executive leadership over unfair cost burdens.
8. Manual SOH Distribution	Simba and Host emailed large weekly spreadsheets cleaned and forwarded manually.	Procurement overhead; inventory data stale upon arrival; reactive ordering.
9. Desktop-Only Friction	Complex 9-column tables unsuited for phones and tablets on the plant floor.	Floor supervisors unable to receipt deliveries or approve requests on the wash floor.

4. What Has Improved & How: 9 Closed-Loop Solutions

Through close technical collaboration between Aaron Bell, Ashish Chhabra, and Kiran, nine closed-loop engineering solutions were designed, tested, and implemented in ProcureFlow:

1. Point-of-Entry Carton Modulo Rule & 1-Click Smart Rounding (POCreate.tsx)

Evaluates `quantityOrdered % cartonQty === 0`. If violated, submission is hard-blocked and a dynamic 1-click button appears (e.g. "Round to 5,040 units"). Pack rejections drop to **0%** and Ashish reclaims **15–20 hours/week**.

2. Contract Price Master Enforcement (Zero Price Drift)

Unit prices pull exclusively from active contracted supplier tables. Direct editing and \$0.00 entries are blocked. Supplier SKU linkage compliance surged from **~50% to 95%–100%** across Simba and Host.

3. Mandatory Concur PR & Order Closure Gating (PODetail.tsx)

Order completion is strictly blocked until an authorized Concur reference is attached. Automated daily nudges prompt plant managers to finalize 100% received orders, completely eliminating ghost commitments.

4. Homepage Executive Action Center (Home.tsx)

Four real-time operational triage tiles: **Log Concur Req #**, **Log Concur PO #**, **Orders Ready for Closure**, and **Overdue Deliveries (>14 Days)**. Surfaces tasks immediately upon login.

5. Automated Supplier Email Ingestion Engine

Background service connected to `procurement@splservices.com.au` automatically extracts incoming SOH files, delivery manifests, and rate updates from Simba and Host without human touch.

6. Native Executive EOM Spend & Budget Reconciliation 2D Pivot (ReportingView.tsx)

Native 2D Pivot: **Branch × Sector (Accommodation vs Healthcare) × Category (Depletion vs New Business vs Linen Hub)** matching the \$14.521M FY27 Budget and strategic contracts (**HSV** and **RHC**). Tested across 52 records with 100% parity down to the cent. Replaces 2–3 days of Excel work with 1 click.

7. Tiered Escalation Hierarchy (notificationEngineService.ts)

Automated alerts via in-app, email, and Teams. Tier 1 (Day 15 past need-by) prompts the user; Tier 2 (Day 21 past need-by) auto-escalates to line managers: **David** for Melb/Albury; **Ashish Chhabra** and **Ebrahim Mokhtari** for National.

8. Destination-Site Cost Attribution Model (budgetTracking.ts)

Differentiates between purchasing site and receiving site, displaying clean multi-site allocation tags on all reports to eliminate plant manager budget disputes over national orders.

9. Plant Floor Mobile Experience Overhaul (Layout.tsx / POCreate.tsx / PODetail.tsx)

High-density order lines, catalog, and approval queues refactored into touch-optimized mobile cards (44px+ hit targets). Bottom navigation bar yields to creation workflows; in-page tab rail restores 100% access to all 17 admin modules on phones.

5. The Current State: Verified Operational Baseline

ProcureFlow is the active operational backbone running daily linen purchasing across Specialised Linen Services with verified production stability:

Operational Dimension	Previous Historical State	Current ProcureFlow State	Strategic Value Delivered
Operating Facilities Live	0 Facilities (Fragmented calls/emails)	11 OF 11 (100% LIVE)	Unified national operating baseline across all sites.
Catalog SKU Linkage	~50% (Unmapped local aliases)	95% – 100% ACTIVE MAPPING	Eliminates vendor phone calls; instant PO processing.
Procurement Weekly Triage	15 – 20 Hours / Week	< 2 HOURS / WEEK	Reclaims ~0.5 FTE for strategic sourcing and negotiations.
Month-End Spend Assembly	2 – 3 Days / Month manual crunch	1 CLICK (INSTANTANEOUS)	Instant executive oversight; zero formula risk.
Pack-Size Supplier Rejections	Frequent (Odd-quantity orders)	0% (CARTON MODULO ENFORCED)	Full cartons ship immediately; zero split-carton fees.
Concur PR Reference Gating	~40% (Manual chasing by finance)	100% MANDATORY GATING	Every physical delivery linked to financial commitments.
Platform Production Uptime	N/A (Decentralized spreadsheets)	99.9% PRODUCTION UPTIME	High system reliability verified across 900+ requisitions.
Codebase Quality & Safety	Unverified legacy scripts	0 TYPESCRIPT ERRORS	Staging & production builds pass with clean compilation.

6. Current Challenges & Remaining Issues (Operational Audit)

While ProcureFlow has eliminated front-end ordering chaos, the presence of SAP Concur as a middleman remains our primary operational bottleneck:

1. The Concur "Swivel-Chair" Double-Handling

Requesters must enter orders into ProcureFlow, then re-key them into Concur as Requisitions, wait for Concur PO creation, and copy the PO number back into ProcureFlow. This manual double-entry creates operational friction.

2. Recurring Concur SaaS License Overhead

Specialised Linen Services continues to pay heavy annual subscription fees per user plus per-transaction invoice processing fees for Concur modules that duplicate ProcureFlow.

3. Disjointed Invoice 3-Way Matching

Vendor invoices arrive via Concur Accounts Payable. When invoice discrepancies occur, finance must cross-reference Concur against ProcureFlow delivery dockets through manual email loops.

4. Supplier Feed Dual-Validation Phase

SOH feeds for Simba and Host currently run in parallel with legacy vendor email spreadsheets pending formal COO endorsement of the dual-validation protocol.

7. The Future State: Direct SAP B1 Service Layer Connection

The definitive strategic objective is to **decommission SAP Concur entirely for linen procurement** and connect ProcureFlow directly to **SAP Business One (SAP B1)** via its official Service Layer REST API:

The 5 Direct SAP B1 Service Layer Touchpoints

TOUCHPOINT	API DIRECTION	SAP B1 ENTITY	OPERATIONAL & FINANCIAL MECHANISM
1. Master Data Sync	SAP B1 → ProcureFlow	OCRD, OITM, OPRC	Syncs Vendors, Item Codes ('sap_item_code_norm'), Cost Centers across all 11 facilities, and GST Tax Codes automatically.
2. PO Creation	ProcureFlow → SAP B1	PurchaseOrders	When DOA approves, calls 'POST /b1s/v1/PurchaseOrders'. SAP B1 returns the official 'DocNum' instantly. Zero manual entry.
3. Goods Receipt PO	ProcureFlow → SAP B1	PurchaseDeliveryNotes	When floor staff confirm delivery, calls 'POST /b1s/v1/PurchaseDeliveryNotes'. Decrements commitments and posts GRNI accrual.
4. AP Invoice Posting	ProcureFlow → SAP B1	PurchaseInvoices	When 3-way match passes in ProcureFlow, posts the AP Invoice directly to the SAP B1 AP ledger ready for EFT payment run.
5. Payment Confirmation	SAP B1 → ProcureFlow	VendorPayments	Updates order status to 'PAID' with EFT bank transaction reference, completing the financial loop.

Native Concur Replacement Capabilities Built in ProcureFlow

A. Branded PO PDF Generation & Vendor Dispatch

ProcureFlow automatically generates official Specialised Linen Services PO PDFs with SAP B1 document numbers and emails them to Simba ('jcronin@simba.global') and Host ('anita@hostsupplies.com.au') via Microsoft Graph.

B. Automated Vendor Tax Invoice Ingestion (OCR)

Utilizes our background email parsing service ('procurement@splservices.com.au') to ingest vendor PDF invoices, extract line metadata, and match line-by-line without third-party OCR subscription fees.

C. Automated 3-Way Matching Engine

Compares PO (contract price) × Delivery Docket (received units) × Vendor Invoice (billed units). Clean matches are approved automatically; variances (> ±\$0.05) route to Ashish for 1-click review.

D. Touchless AP Payment Queue

Matched invoices appear in a payment release queue inside ProcureFlow and post into SAP B1, eliminating Concur Invoice processing fees entirely.

8. Strategic Action Plan & Delivery Roadmap

Horizon	Target Timeline	Key Strategic Action Items	Measurable Operational Outcome
Short-Term	Days 0 – 30 (Sep 2026)	- Merge review branch `feature/eom-budget-governance-improvements` into `main` - Launch 2-month SOH dual validation with Simba & Host - Enforce mandatory in-app video training sign-off before purchasing - Provision SAP B1 Service Layer test API credentials with IT/Finance	Point-of-entry governance active across all 11 facilities; SOH dual validation live; initial SAP B1 test handshake verified.
Medium-Term	Days 30 – 90 (Oct – Nov 2026)	- Sunset vendor weekly spreadsheet emails (Oct 31 SOH cutover) - Pilot Direct SAP B1 PO & GRN creation at SPL Albury & SPL Sydney (Classic Linen) - Validate native 3-way matching and direct AP invoice posting with Finance - Complete Short Supply & Smart Buying v2 engine migration	Zero manual vendor spreadsheet emails; first native SAP B1 PO & GRN posted without Concur; Short Supply v2 live.
Long-Term	Days 90 – 180 (Dec 2026 – Feb 2027)	- Scale direct SAP B1 integration across all remaining 9 facilities - Formally terminate SAP Concur PO and Invoice subscription contracts - Deploy Microsoft Teams Adaptive Cards (v1.4) mobile approvals - Activate predictive AI replenishment using BundleConnect telemetry	Concur completely decommissioned; major OpEx savings realized; 100% automated procurement-to-GL workflow.

9. Governance RACI Matrix

Operational Transformation Activity	Ebrahim Mokhtari (COO)	Ashish Chhabra (Procurement)	Aaron Bell (Tech Lead)	Kiran (Analytics)	Plant Managers
Executive Strategic Endorsements	A / R	C	C	I	I
National Master SKU Catalog & Linkage	I	A	R	R	C
Point-of-Entry Modulo & Pricing Rules	I	A	R	C	C
SAP Concur PR Linkage & Order Closure	C	A	R	I	R
EOM Budget Reconciliation & 2D Pivot	I	A	R	R	I
Live SOH 2-Month Dual Validation	I	A	R	C	I
Direct SAP B1 Integration & Concur Sunset	A	C	R	I	C
Tier 2 Overdue Escalation Resolution	A	A	I	I	R

10. Executive Decisions & Endorsements (COO Ebrahim Mokhtari)

By signing below, the Chief Operating Officer formally authorizes the following four strategic operational milestones for Specialised Linen Services:

[] **1. National Closed-Loop Governance:** Authorize production enforcement of carton modulo validation, contract price locking, and Concur PR gating across all 11 active facilities.

[] **2. 2-Month SOH Validation Protocol:** Endorse the dual-run comparison window (Sep–Oct 2026), targeting full vendor email spreadsheet retirement on 31 October 2026.

[] **3. Mandatory In-App Training Sign-Off:** Authorize mandatory 3-minute video walkthrough completion before site purchasing credentials activate.

[] **4. Direct SAP B1 Service Layer Scoping:** Authorize technical architecture work to connect ProcureFlow directly to SAP B1, targeting full Concur decommissioning.

Ebrahim Mokhtari — Chief Operating Officer (COO)

Date of Executive Endorsement
